## ABOUT NIFTEM

National Institute of Food Technology Entrepreneurship and Management (NIFTEM) has been conceptualized by Government of India on persistent demand of food industry to have an apex body as a one stop solution provider for various problems of the sector. Ministry of Food Processing Industries, Government of India has set up this institute with an initial investment of Rs. 500 crores (US \$125 million). The institute is spread over an area of 100 acres in Kundli, Sonapat (Haryana). It intends to act as a Center of Excellence in the area of Food Technology and Management. It caters to needs of various stakeholders such as entrepreneurs, industry, exporters, policy makers, government and existing institution. NIFTEM's mandate is to work as "Sector Promotion Organization" & "Business Promotion Organization" of the food processing sector. The academic courses like B.Tech. (Food Technology and Management), M.Tech. in five specialized areas, Ph.D. and M.B.A (Food & Agri-Business Management) are offered at NIFTEM.

## ABOUT CIPET

Central Institute of Plastic engineering and technology (CIPET), Murthal established in the year 2006 in Haryana. CIPET is an ISO 9001:2015 certified institute for providing academic and technical support services for sustainable growth of Plastics & allied industry in the region. The centre provides third party product Inspection Services to various Government Organizations as per our approved scope under NABCB accreditation according to ISO/IEC - 17020:2012 and Job oriented skill development training programmes in various skill trades which are aligned as per NSQF (National Skill Qualification Framework) of NSDA. The academic course like PG-Diploma, Post Diploma and Diploma Programs are duly approved by AICTE. CIPET serve as centre of excellence for researchers to make their career in an environment of applied research.

## ABOUT WORKSHOP

Workshop on Innovative Food Packaging and Testing is the first workshop on food packaging jointly organized by NIFTEM, Kundli and CIPET, Murthal. Recent technological advancements have radically changed life style in general and food processing in specific, leading to surge in demand for processed and packaged food. There are significant evolution of novel and innovative food packaging methods and techniques which has not only increased the shelf life of foods, but also improved food safety and quality. This workshop aims to provide platform for lectures by invited speakers from academia and industry, discussions on various new concepts and technologies required for innovative food packaging materials, explore recent technologies in food packaging, investigate the influence of packaging material on shelf life and food safety. One day session on hand-on-training on preparation, testing and quality evaluation of food packaging materials complements the objective of the workshop.
